Subject: Call for case studies on the use of agricultural biotechnologies

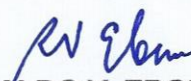

Dear Colleagues:

This has reference to the Call for case studies of the Food and Agriculture Organization (FAO) on the use of agricultural biotechnologies.

The FAO published a collection of case studies on this topic in 2021, and to update it, the organization intends to publish a new set of case studies on the use/applications of agricultural biotechnologies in crop, forestry, livestock, and fisheries/aquaculture sectors. Since the 2021 publication did not include any case studies on the practical application of forest biotechnologies, FAO encourages the APAFRI members to submit proposals and represent their sector in the updated publication. As mentioned in APAFRI's official communication, you may also wish to submit a case study (a broad definition of "biotechnologies" apply).

In this regard, we encourage you to submit abstracts, with a maximum of 300 words and in English, of your proposed case studies to Agri-Biotechs@fao.org by June 15, 2022, and copy furnish pcmd@pcaarrd.dost.gov.ph, for our division's monitoring purposes. You may access more information on the Call through <https://bit.ly/3zbJNjH> or <https://bit.ly/3M64BMk>.

Please feel free to disseminate this opportunity within your network. Thank you for your continued cooperation.

REYNALDO V. EBORA, PhD
Executive Director
